## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by US Patent No. 7,149,197 to Garahi et al. (hereinafter "Garahi").

Regarding claim 1, Garahi teaches a method for wireless local area network throughput enhancement **[Fig. 1]**, comprising:

providing an access point **[Fig. 1; IAP 104 or 132]** in a wireless computer network transmitting data packets over radio frequency signals;

providing an endpoint station, **[Fig. 1; User Terminal 118]** receiving said data packets, in a wireless computer network;

reordering said data packets into a megapacket in said access point using concatenation of said data packets and transmitting said megapacket to said station **[Fig. 1; IAP 132 can aggregate traffic to the core LAN 102 by concatenating many small packets into large ones. Likewise the core LAN 102 can aggregate data**

Art Unit: 2616

**packets to IAP 132, which subsequently transmits the aggregated data packet to the user terminal; col. 8, line 64 – col. 9, line 12].**

***Allowable Subject Matter***

2. Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- US Patent No. 6,791,962 to Wentink discloses "Direct Link Protocol In Wireless Local Area Network"
- US Patent Application Pub. No. 2005/0030976 A1 by Wentink discloses "Link Margin Notification Using Return Frame"
- US Patent No. 7,099,654 to Yoshikawa Tewfik discloses "High Speed Wireless Sensor, Server And Storage Networks"

Art Unit: 2616
